

AI Product Manager Learning Plan (July–December 2026)

Mission: Become an elite AI Product Manager by year-end through deliberate technical learning, product strategy, and weekly shipping.

July

Master LLMs, RAG, agents, evaluation, prompting.

August

Build AI apps using LangGraph, MCP, Bedrock, OpenAI, Anthropic.

September

Master product management, PRDs, metrics, pricing, customer discovery.

October

Deep dive into AI systems: guardrails, observability, routing, inference.

November

Business strategy: security, compliance, ROI, enterprise sales.

December

Portfolio, interview prep, publish projects and technical writing.

Weekly Reflection Template

- Biggest concept learned
- What I built
- Biggest challenge
- Questions to research
- One thing to improve next week
- Hours invested
- Confidence (1–10)
